Summary

Computer Science undergraduate with a strong foundation in Java, Python, C++, React, and AI technologies. Experienced in backend development, database applications, and developing intelligent software solutions. Passionate about building scalable systems and continuously enhancing technical expertise through hands-on projects and practical problem-solving.

Education

Bachelor of Science in Computer Science

Punjab University College of Information Technology (FCIT), Lahore

Expected: May 2027

CGPA: 3.30 / 4.00

Coursework: C++, Artificial Intelligence Fundamentals, OOP, Data Structures and Algorithms

Projects

Resume Analyzer

Java, Spring Boot, MySQL, Ollama, Docker

- Developed a **Spring Boot REST API** enabling PDF resume uploads, extracting text via **Apache PDFBox** and persisting data in **MySQL** using JPA.
- Integrated **Ollama (LLaMA 3.2)** to analyze resumes against job descriptions returning match score, matching skills, missing skills and recommendations.
- Containerized the full stack with **Docker Compose** orchestrating Spring Boot, MySQL and Ollama for seamless deployment.

Business Analyzer Agent

CrewAI, Ollama (LLaMA 3.2), Streamlit

- Developed a **multi-agent AI system** achieving **87% insight accuracy** using autonomous agents and real-time financial data.
- Improved **decision-making speed by 40%** through automated analysis, document ingestion, and an interactive Streamlit UI.

Sports Day Registration System

Flask, SQLite, Python

- Built a web application for managing sports day event registrations with separate **admin and student roles**, each with role-based access control.
- Implemented **SQLite** database integration for storing student and event registration data efficiently.

Activities & Leadership

Computer Architecture Challenge

February 2026

- Secured **Runner-up position** demonstrating strong understanding of low-level computing concepts and problem solving skills.

Game Design Competition

2024

- Achieved **Runner-up position** by designing innovative game concepts and mechanics.

Graphic Designer (UI/UX)

2023–Present

- Designed and improved user interfaces for software applications to enhance usability and user experience.

Technical Skills

Programming Languages: C, C++, Java, Python, JavaScript

Frontend Development: React, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Three.js

Backend Development: Spring Boot, Flask, REST APIs

Mobile Development: Android App Development

Databases: Oracle Database, SQL, PL/SQL, SQLite

Developer Tools: Git, GitHub, Docker, VS Code, IntelliJ IDEA, PyCharm, Android Studio

UI/UX Tools: Figma, Adobe Photoshop, Adobe Illustrator, Canva
